

Single return contact concentrates electrons to one point - reducing RCA plug "eddy current" distortion. The single contact point is a similar approach to "star earthing" in amplifiers.

Fast heating solder platforms – for clean, efficient soldering.

Compatible with all RCA sockets.

Direct 24k gold plating. No nickel substrate to interfere with sound quality.

Engineering-grade polymer collar adjusts to your RCA socket to provide a secure, firm fit – yet is easy to disconnect. The Bullet Plug® will not vibrate loose.

Tellurium Copper (CuTe) contact pins provide up to 320% greater conductivity than standard brass pins.
